

## AcuteCare Telemedicine Announcing New Partnership with Bon Secours in Collaboration with InTouch Health

[AcuteCare Telemedicine](#), the leading practice-based provider of Telemedicine services for hospitals seeking around-the-clock stroke and other urgent Neurological care, announces its newest collaborative partnership with [Bon Secours Neuroscience Institute](#) (BSNI), the neuroscience division at the not-for-profit Catholic health system sponsored by Bon Secours Ministries.

Bon Secours first established teleneurology initiatives 5 years ago at its smallest hospital, Richmond Community Hospital, with a goal to have all of its area hospitals joint commission certified. Patricia Lane, Bon Secours Richmond Administrative Director of Neurosciences says, "Working with the AcuteCare Telemedicine partners feels like an extension of the internal practice. They are truly in alignment with Bon Secours efforts to identify the right path to create continuity of care from the time the patient is admitted to our Emergency Room to the time they leave the hospital. AcuteCare is not just a provider, but invested team members who take pride in providing the best quality of neurological care to our patients."

By utilizing innovative telecommunication technology, BSNI patients are able to undergo remote consultation with AcuteCare Telemedicine neurology specialists in Atlanta, Georgia. [Dr. Matthews W. Gwynn](#), CEO AcuteCare Telemedicine says, "The neurologists of AcuteCare Telemedicine look forward to helping the Richmond and Kilmarnock areas achieve even greater quality in emergency care for their neurological patients through timely, professional medical consultations using the latest advanced communication technology with our partners at InTouch Health."

AcuteCare Telemedicine is collaborating with [InTouch Health](#) to bring 24/7 extended teleneurology services to BSNI. InTouch Health provides technology enabled services to healthcare providers for the delivery of high-quality clinical care virtually anywhere, anytime. The InTouch® Telehealth Network enables healthcare systems to deploy telehealth applications across their enterprise. Patricia Lane comments, "I just love the technology and clinical solutions platform. It allows for continuity in communications from doctor to doctor and permits the real-time sharing of information between care-givers. Our ultimate goal is to provide a better treatment plan for each patient. AcuteCare Telemedicine and InTouch are the right solution to attain our goals and objectives with our teleneurology initiatives."

Yulun Wang, Chairman & CEO, InTouch Health said, "We are honored to partner with the Bon Secours Health System to bring greater access to quality care at lower costs into the communities they serve. InTouch Health's enterprise-wide Telehealth Network, in combination with high-quality remote physician services, can touch more of Virginia's population through Bon Secours' extensive network of hospitals and ultimately into ambulatory care facilities, clinics, long term care and patients' homes."

AcuteCare Telemedicine continues to expand its geographic imprint in telestroke care, and is very excited for the opportunity to drive impact for Bon Secours as they continue to enhance their telestroke network.

“The advancements in teleneurology not only allow us to access more patients in need of our specialized care, but also improves patient outcomes overall,” comments Dr. Keith Sanders, COO, AcuteCare Telemedicine. “The success of any program hinges on a seamless execution from door to needle. This collaboration is sure to have a significant impact on the patients and communities it serves.”

### **About AcuteCare Telemedicine**

Founded in 2009, AcuteCare Telemedicine is a limited liability corporation advancing the opportunity for healthcare institutions to gain access to highly-respected, expert neurologists and telemedicine technologies. AcuteCare offers a range of services including first-rate neurological emergency response care with around-the-clock support and hospital accreditation education. AcuteCare primarily provides remote emergency neurology consultation which fills staffing needs and reduces the costs associated with 24/7 neurologist availability. As a result, healthcare institutions provide full service emergency neurology care and can earn Joint Commission Certification as a Primary Stroke Center.

### **About Bon Secours Virginia Health System**

Bon Secours Virginia provides good help to thousands of Virginians through a network of hospitals, primary and specialty care practices, ambulatory care sites and continuing care facilities across the Commonwealth. The not-for-profit health system employs more than 12,500 people, including nearly 800 providers as part of the Bon Secours Medical Group.

The fourth largest and only faith-based health system in Virginia, Bon Secours Virginia offers a full range of services including cardiac, women’s, children’s, orthopaedics, oncology, neurosciences and surgery at eight award-winning hospitals.

- Bon Secours Richmond is St. Mary’s Hospital, Memorial Regional Medical Center, Richmond Community Hospital, Rappahannock General Hospital and St. Francis Medical Center.
- Bon Secours Hampton Roads is Maryview Medical Center, DePaul Medical Center and Mary Immaculate Hospital.

### **About Bon Secours Virginia Health Care Foundation**

The Bon Secours Virginia Health Care Foundation raises charitable funds to help Bon Secours Virginia Health System address the community’s growing health care needs with compassion and excellence. Through charitable support, we are dedicated to helping create healthy communities, advancing clinical innovation and providing an extraordinary experience of care.
