

## CHRISTINE HALE, M.D. JOINS ACUTECARE TELEMEDICINE ADVISORY BOARD

June 26, 2012 – Atlanta, GA: [AcuteCare Telemedicine](#) (ACT) announces the addition of Christine Hale, M.D. as a member of the ACT Board of Advisors. The partners of ACT believe Hale's expertise and passion for improving healthcare delivery will aid the company in effectively extending the highest level of care to its client hospitals.

Hale's impressive medical background includes receiving her M.D. from Johns Hopkins and completing her residency in Pediatrics at Duke University Medical Center. While at Duke, she also completed an M.B.A. with a concentration on Health Sector Management at the University's Fuqua School of Business, giving her a unique skillset in approaching hospital operational issues with a medical perspective.

Presently working with McKinsey and Company in Atlanta, GA, Hale serves hospitals and hospital systems on a variety of organizational issues with an emphasis on strategic planning. She is a resource for numerous consultant teams interested in bettering healthcare delivery across the Southeast.

"Dr. Hale shares in ACT's zeal and commitment to helping hospital facilities deliver higher quality care to patients in the most economically and operationally efficient means," says James Kiely, M.D., Ph.D., Partner, ACT. "We are extremely pleased to have access to Dr. Hale's knowledge and experience as a trusted, go-to resource in measuring our approach to providing the best possible services to client hospitals."

### About AcuteCare Telemedicine

Founded in 2009, AcuteCare Telemedicine is a limited liability corporation advancing the opportunity for healthcare institutions to gain access to highly-respected, expert neurologists and telemedicine technologies. AcuteCare offers a range of services including first-rate neurological emergency response care with around-the-clock support and hospital accreditation education. AcuteCare primarily provides remote emergency neurology consultation which fills staffing needs and reduces the costs associated with 24/7 neurologist availability. As a result, healthcare institutions provide full service emergency neurology care and can earn Joint Commission Certification as a Primary Stroke Center.
