

## ACUTECARE TELEMEDICINE SHARES TELENEUROLOGY INSIGHTS AT 2012 GPT CONFERENCE

Atlanta, GA: March 27, 2012 – Dr. Matthews Gwynn, Partner, [AcuteCare Telemedicine \(ACT\)](#) delivered a presentation discussing the future of teleneurology in the next decade during the 2012 [Georgia Partnership for Telehealth \(GPT\)](#) Conference at the Ritz-Carlton, Reynolds Plantation in Lake Oconee, GA on Thursday, March 15<sup>th</sup>.

The conference attracted physicians, nurses, administrators, and other healthcare industry professionals and covered a wide variety of topics related to telehealth, including recent innovations, advocacy and education, policies and regulations, and case studies. GPT's mission is to improve and promote the availability and provision of specialized healthcare services in rural and underserved parts of Georgia through telehealth technology. Presenters including healthcare network [Optum](#), telecommunications provider [USAC](#), and others addressed a variety of ways to overcome barriers that exist for patients living in rural parts of the state at a distance from medical facilities.

Dr. Gwynn's presentation, visible in its entirety on the [GPT website](#), was entitled "Beyond tPA: Teleneurology for This Decade." Dr. Gwynn began by discussing the prevalence of stroke, and covered a brief historical outline of the integration of telemedicine technologies in cutting edge neurological care. He then offered case studies demonstrating the value of teleneurology in creating a higher standard of stroke care in the future. Dr. Gwynn illustrated that teleneurology will not only improve care, but also play a vital role in helping healthcare providers meet changing standards and tightening budgets.

"The partners of ACT truly believe that teleneurology is forging a path through a new frontier in medicine that will ultimately result in better patient care with a lower associated cost," said Gwynn. "Presenting ACT's outlook at the GPT Conference was an outstanding opportunity to share our vision with other industry leaders. Both healthcare providers and our patients benefit from this exchange of knowledge."

### About AcuteCare Telemedicine

Founded in 2009, AcuteCare Telemedicine is a limited liability corporation advancing the opportunity for healthcare institutions to gain access to highly-respected, expert neurologists and telemedicine technologies. AcuteCare offers a range of services including first-rate neurological emergency response care with around-the-clock support and hospital accreditation education. AcuteCare primarily provides remote emergency neurology consultation which fills staffing needs and reduces the costs associated with 24/7 neurologist availability. As a result, healthcare institutions provide full service emergency neurology care and can earn Joint Commission Certification as a Primary Stroke Center.
